WORK EXPERIENCE

Software Developer Verizon

08/2015 - 11/2016

Hyderabad, India

Backend Java developer

Achievements/Tasks

- Involved in creating a amazing system for a Verizon Enterprise Business team called vPrice, responsible to catalog all the enterprise products and their respective prices and discounts. Major part of code was EJBs/Java and REST Services.

Software Analyst Verizon

12/2016 - 05/2018

Hyderabad

Full-Stack Development

Achievements/Tasks

- Promoted up the ranks. A team of 3 members, we developed a super-utility web tool (using vanilla JS/HTML/CSS and REST) for sales reps who can see the best viable product for the client and create a temporary pseudo quote. This was peculiar, as we needed to bypass a huge middleware infrastructure and directly connect to the servers to avoid the tedious processes in between.

Senior Software Developer Oracle

08/2018 - Present

Hyderabad

Full Stack Developer

Achievements/Tasks

- I am currently involved in creating, maintaining, and enhancing oracle's famous ERP tool - EBS. As a full-stack software developer, I have successfully created and delivered various components in this product impacting the customer experience for various business users. Tech stack - Javascript(Native) and Java(EJBs). Lately involved in creating a new dashboard for product teams using React JS.

EDUCATION

Graduation

Birla Institute of Technology, Mesra

08/2011 - 05/2015

Ranchi, India

Courses

- Bachelors of Engineering, Computer Science

SKILLS

Web Apps

CSS

HTML

Javascript

React

Java

Algorithm

GIT

Node

Express

PERSONAL PROJECTS (CHECKOUT GITHUB PROFILE)

My Portfolio (Web Development)

- You can find my portfolio here - <https://arpiti.github.io/MyPortfolio/index.html>

HealthyBookar.com (06/2021 - Present)

- The project is in progress. It's a simple Nutrition based Food subscription app specially designed to serve Pregnant mothers and their newborn. Complete tech stack is solely built by me as a SPA using React and Firebase for one of my friend who happens to be the founder of HealthyBookar firm. (Early stage startup)

Cloning Amazon (05/2021 - Present)

- This project is in progress. Created a clone of amazon starting from authentication > Selecting Product > Ordering > Checkout. This even involves the integration of Stripes Payment API. Core tech used is React and Firebase. The project is already available in my git repo. Will soon host it on Netlify to be viewed generally in public.

Firegram - Instagram Gallery Clone App (04/2021 - 05/2021)

- Instagram look alike gallery project hosted on Netlify, where you can add photos and view it just like your Instagram feed. You can find the code on my repository. <https://pedantic-liskov-b381d8.netlify.app>

Movie App (04/2021 - 04/2021)

- A utility movie web app where you can find details about most recent and upcoming movies and series, their reviews, watch its trailer, genre, release date, popularity, language and more. Hosted on Netlify and code available on github. (<https://arpit-movie-review-app.netlify.app>)

CountrySearchApp (04/2021 - 05/2021)

- It's a simple app to learn about the existing countries in the world. You can find Info about any country just by putting in the name. Source file at my github repo. (<https://infallible-hoover-8fe2fb.netlify.app>) Checkout my github repository for more.
