WORK EXPERIENCE

Software Developer
Verizon

08/2015 - 11/2016   *Hyderabad, India*
Worked as a core java developer

Achievements/Tasks
- Involved in creating a pricing engine for a Verizon Enterprise Business team - vPrice responsible to catalog all the products and their respective prices and discounts. The whole work was around EJBs and SOA communication.

Software Analyst
Verizon

12/2016 - 05/2018   *Hyderabad*
Had somewhat the similar developing role but bigger responsibilities.

Achievements/Tasks
- We were responsible for analyzing the most focussed part of our pricing engine quotes and create a quick dashboard service for the most used or brought products.

Senior Software Developer
Oracle

08/2018 - Present   *Hyderabad*
Joined OAF team under ATG group to work for EBS

Achievements/Tasks
- With some previous understanding of an ERP product, I am currently involved in creating and maintaining components/products as per the customer requirement on Oracle's EBS tool. We also provide consistent support and solve issues as and when they occur in the existing product. It is here where I got my most handson the front end languages. With time getting expertise in Javascript. Even self-learning REACTjs.
- Learning Javascript/React. Making projects in my GIT repository.

EDUCATION

Graduation
Birla Institute of Technology, Mesra

08/2011 - 05/2015   *Ranchi, India*
Courses
- Bachelors of Engineering, Computer Science

10+2
Lucknow Public School, Sahara States

03/2010 - 04/2011   *Lucknow, India*

SKILLS

`Web Apps` `CSS` `HTML` `Javascript` `React`
`Java` `Webflow` `Algorithm` `GIT`

PERSONAL PROJECTS

HealthyBookar.com (06/2021 - Present)
- The project is in progress. It's a simple Nutrition based Food subscription app specially designed to serve Pregnant mothers and their newborn. Complete tech stack is solely built by me as a SPA using React and Firebase for one of my friend who happens to be its founder of HealthyBookar.

Cloning Amazon (05/2021 - Present)
- This project is in progress. Created a clone of amazon starting from authentication > Selecting Product > Ordering > Checkout. This even involves the integration of Stripes Payment API. Core tech used is React and Firebase. The project is already available in my git repo. Will soon host it on Netlify to be viewed generally in public.

Firegram - Instagram Gallery Clone App (04/2021 - 05/2021)
- Instagram look alike gallery project hosted on Netlify, where you can add photos and view it just like your Instagram feed. You can find the code on my repository. https://pedantic-liskov-b381d8.netlify.app

Movie App (04/2021 - 04/2021)
- A utility movie web app where you can find details about most recent and upcoming movies and series, their reviews, watch its trailer, genre, release date, popularity, language and more. Hosted on Netlify and code available on github. (https://arpit-movie-review-app.netlify.app)

CountrySearchApp (04/2021 - 05/2021)
- It's a simple app to learn about the exisitng countries in the world. You can find Info about any country just by putting in the name. Source file at my github repo. (https://infallible-hoover-8fe2fb.netlify.app)

Project Name

Yohatloc (02/2021 - 03/2021)
- A small freelance project of mine. Created a SPA site for a manufacturer. Link - www.yohatloc.in

Other Mini JS/React and UNITY projects
- There are some other mini projects involving HTML/JS/CSS and react . Also I have made severla UNITY game in the process. So have a nice idea about designing stuff too.
